

Swing Spout Distributor

Advancing Process Performance

- Heavy duty single, dual or triple spout swing spout distributor.
- Distribute product from multiple sources simultaneously to a common set of destinations using a single spout to each bin.
- Reduced spouting requirements.
- Less spouting congestion.
- Eliminate product carry-over from multiple discharge conveyors.

Features

- Single, double or triple swing spout configurations
- Heavy duty construction
- Large inspection doors
- Heavy duty positioning drives
- Advanced PLC position control
- Absolute position feedback eliminates relative position count
- Accurate positioning in both directions
- Efficient positioning direction control for quick position changes
- Continuous sensor and position monitoring, complete with alarms for dependable position control
- Optional network interface to plant automation
